Premise of our Discord Bot: The goal of our Discord bot was to create a bot that would retrieve and output data from a Top 500 Movies csv dataset that was used as a data source for Project 1. The purpose of the bot is to have the user interact with it with 4 commands: !help, !guessrank, !age, !comparegross. Based on the command names, the bot will prompt the user to enter a value that is either correct or incorrect. The following screenshots demonstrate the bot's proof of life and successful interaction with the user:

!help command:

!guessrank command:

!age command:

Anisha Ponugupati
